SENSITIVE SKIN EXPERT

Designed and tested
for tropical skin

^ From PT Paragon Technology and Innovation

The expert of sensitive skin that is born in high technology microbiome laboratory

with advance science, specially designed & tested for Tropical sensitive skin that constantly evolves to deliver new innovative solution with the highest efficacy and ingredients for any sensitive skin problem.

Labore formula is designed and tested using clinical instruments specifically for tropical skin.

Moist and
light texture

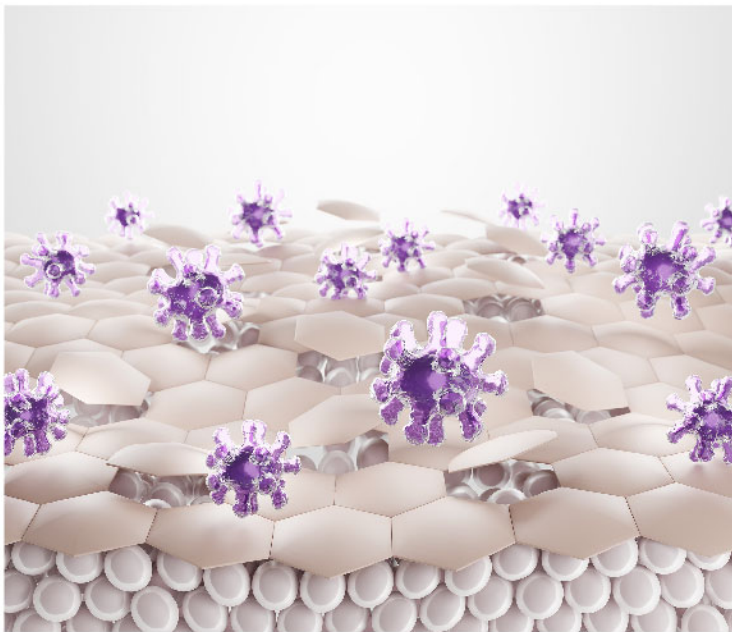

Not to
occlusive

Use delicate and
sensitive skin
friendly ingredients

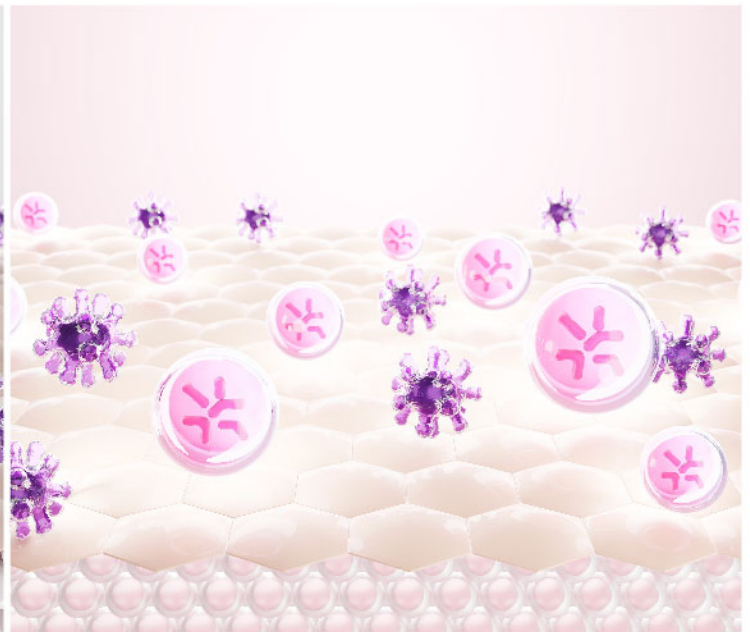

Based on studies, there are significant variations in microbiome composition from healthy individuals in different geographical location and ethnicity categories.

Labore formulated Microbiome Technology™ specifically for tropical country skin.

Before using Labore:

Unbalanced microbiome caused by internal and external factors, results in unhealthy and damaged skin barrier and trigger sensitive skin reaction.

After using Labore:

Labore with Microbiome Technology™, help to rebalance skin microbiome, and help to support skin barrier

LABORÉ
